

CORROSION PROTECTION PLUS

COATING FOR USE ON HVAC&R UNITS AND COILS

CORROSION PROTECTION IMPROVES ENERGY, REDUCES COST

Highly corrosive and/or coastal environments reduce the effective lifespan of metals, air conditioning, refrigeration and all metallic surfaces.

AerisGuard™ Corrosion Protection PLUS is a self-etching high performance modern polymeric water based coating that has been specifically designed for in-the-field applications to coat and protect metallic surfaces.

For best practice and optimal results*
- pair with AerisGuard Outdoor Coil & Surface Cleaner as below:

PRODUCT NOTES

*Always refer to SDS and IFU prior to product dilution and application

PRODUCT OVERVIEW

AerisGuard™ Corrosion Protection is applied pre or post installation to HVAC&R units and coils in domestic, commercial and industrial evaporator and condenser units. This is applied as step 2 of the corrosion protection process. When used in conjunction with AerisGuard™ Outdoor Coil and Surface Cleaner it offers up to 5 years protection.

Ease of application with aerosol or bulk product making it possible for service technicians to use and remove the need and cost for specialist applicators. Tested over 35,000+ hrs ASTM B117-11 salt spray resistance and has no effect on air flow or heat exchange performance.

	Product Type	Product Code	Application Rate
Blue	Aerosol	AG-CPB-A	20ml* per m ² for flat metallic surfaces
	5L	AG-CPB-5	
	20L	AG-CPB-20	200ml* per m ² for 100mm deep coil at 12 fins per inch
Clear	Aerosol	AG-CPC-A	
	5L	AG-CPC-5	
	20L	AG-CPC-20	

CORROSION PROTECTION PLUS

COATING FOR USE ON HVAC&R UNITS AND COILS

FEATURES

- 35,000+ hrs ASTM B117 salt spray resistance test
- Water-based polymer coating
- Applied between 4 to 10 microns
- Reduced cost versus traditional off-site or specialist applicator options
- Aerosol or bulk application to suit
- Hydrophilic
- Flexible
- Abrasion Resistant

BENEFITS

- Energy efficiency gains up to 35%
- Complies with MEPS ratings
- No effects on heat transfer
- 5 year warranty*
- Ease of application in-situ or pre-installation
- Reduced labour cost versus traditional off-site or specialist applicator options
- Self cleaning
- Durable through weather (sandstorms) and movement
