

SURFACE CLEANER & SANITISER

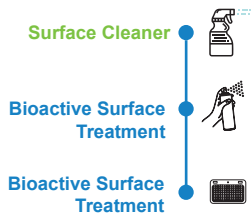

CLEANER AND SANITISER FOR USE ON HARD SURFACES IN HVAC&R SYSTEMS

CLEANER SURFACES, IMPROVED HYGIENE & LONG TERM ANTI-MICROBIAL PROTECTION

Organic & inorganic contaminants increase mould, fungi and bacteria growth on all surfaces, leading to poor hygiene.

To overcome these problems, use AeriGuard™ Surface Cleaner & Sanitiser and AeriGuard™ Bioactive Surface Treatment.

For best practice and optimal results* - pair with AeriGuard™ Surface Treatment and AeriGuard™ Bioactive Surface Treatment as below:

*Always refer to SDS & IFU Prior to product dilution & application

PRODUCT OVERVIEW

AeriGuard™ Surface Cleaner & Sanitiser is designed to provide a simple clean & sanitise solution for hard surfaces in HVAC&R systems including cool rooms, AHUs, high wall unit plastics, drain pans, fans, refrigeration and other hard surfaces.

The easy-to-use spray-on, wipe-off process effectively removes contaminants from hard surfaces & duct work.

Cleaning surfaces in HVAC&R units and systems:

- Food safe + biodegradable
- Prevents blockages + odours
- Complies with AS/NZ 3666 for microbial control/ hygiene
- 12 month warranty*
- Increases system efficiency
- Prolonged asset & equipment life

Surface Cleaner is designed to be used in conjunction with AeriGuard™ Bioactive Surface Treatment. This 2 step process provides long-term residual protection against microbial growth & contamination of the cleaned and treated surfaces.

Product Code	Description	Dilution Rate
AG-SCS-1R	Surface Cleaner 1L Spray	Ready to Use
AG-SCS-5R	Surface Cleaner 5L	Ready to Use

Product Code	Application Rate
AG-SCS-1R	As required (spray-on & wipe-off)
AG-SCS-5R	

SURFACE CLEANER & SANITISER

CLEANER AND SANITISER FOR USE
ON HARD SURFACES IN HVAC&R SYSTEMS

FEATURES

- Non-acid, non-alkaline cleaning process
- Superior cleaning solution
- Compatible with all common cleaning processes
- Multiple modes of application
- No harsh chemicals

BENEFITS

- Saves time with quick and easy preparation
- Easy to use and safe in all work environments
- Can be used on all surfaces including seals
- Eliminates odour causing bacteria
- Complies with DA19 maintenance for best practice

AerisGuard™ cleaners use patented anti-microbial multi-enzyme technology, which is non-toxic and non-acidic to breakdown and digest the biofilm and other contaminants. This is easily removed using water (under pressure for larger scale units).

AerisGuard™ Treatment is then applied to create a biostatic protective coating on the surface. This provides up to 12 months' residual protection to control and prevent mould and odour-causing bacteria. Ideal as part of an annual maintenance program.

Cleaner coils and surfaces result in improved air flow and more efficient heat exchange during the heating and cooling cycle, not only does this mean lower running costs, it also delivers cleaner, healthier air and improved occupant comfort.
