Product & Gear List – Split System Heat Pump

Carefully read & follow the Instructions For Use

BEFORE PROCEEDING:
Prepare and wear PPE safety equipment.

PRODUCT LIST

Product	Product Name	Description
	Surface Cleaner & Sanitiser	Removes existing bacteria, other contaminants & stains
	Multi-Enzyme Coil Cleaner	Removes existing bacteria, mould and other contaminants
	Bioactive Surface Treatment	Provides up to 12 months' residual protection to control & prevent mould & odour-causing bacteria
	Indoor Coil Treatment	Provides up to 12 months' residual protection to control & prevent mould & odour-causing bacteria
	Multi-Enzyme Condensate Pan Tablet	Minimise biofilm formation in condensate drain pans and drain lines
	Bioactive Filter Treatment	Prevents, inhibits and effectively controls the growth of mould, mildew and bacteria on air conditioning filters.

1 **Wet & dry vacuum**

2 **Water pressure washer**
In the range of 100 - 300 PSI.

3 **Aeris product applicator**
4L (1.06 US Gal) pump spray with adjustable nozzle / use larger applicator for large coils.

4 **Tarpaulin / plastic sheeting**

5 **Catch bag / bib**

6 **Step Ladder Platform**

7 **Clean Rags / microfibre cloths**

8 **Powerleads**

9 **Safety over-ride switch**
or Residual Current Device (RCD)

10 **Screwdriver**

9 **Measuring cup**

10 **Broom, mop & bucket**
