

ACS Management

Our management team has over 150 years combined experience working in the Air Conditioning industry. The ACS team is led by our three working directors, Jim Smith, Terry Stones and Bob Benzie. The directors have the know-how and experience to lead our technical, design, sales and service staff members along with our authorised installation and service agents.

ACS Cornerstones are:

1. Our commitment to quality
2. The dedication and integrity demonstrated by our Directors, Managers, Staff & Authorised Service Agents
3. Our commitment to actively listen and deliver superior solutions to our clients.
4. Our guarantee to deliver the highest level of quality service.

Our 'Hands On' focus delivers:

A quality service that ensures the very best advice is given, while recognizing that each of our client's needs are unique, and we therefore approach each client with the ability to be flexible in our services.

Summary

ACS supplies a holistic approach to the Heating, Ventilation, Air Conditioning and Refrigeration environment in which they service. The combined knowledge of the three working Directors and our key management staff will allow your company or organisation to benefit in all aspects from our HVAC / refrigeration expertise.

The company values are **Safety, Service & Added Value**. These key components are being offered to your company or organisation, along with client specific procedures showing you that our approach is always for the benefit of you, the client.

We are very excited to be able to provide you with this new approach to a total HVAC and refrigeration environmental solution and service that will assist you

Air Conditioning Services (NZ) Ltd

OUR PROFILE

Air Conditioning Services (NZ) Limited (ACS) has been operating since 1993, as a 100% New Zealand privately owned company, controlled by our own board of working Directors.

ACS has built an excellent reputation for quality of service and safety. We have steadily developed and expanded our staff of qualified engineering, technical and service personnel.

Our office is located at 8A Walls Road, Penrose, Auckland; from where we coordinate and control our nationwide network of Authorised Service Agents.

Established corporate contract work across a number of different industries has allowed ACS to build a very strong and focused Occupational Health and Safety culture within our team of Authorised Service Agents.

Health and Safety Audit Credits

ACS has completed two full ACC Workplace Safety Management Practice audits in 2006 & 2008. We have been awarded their highest grade - Tertiary Level certification for each audit.

Achieved SHE Stewardship Award from JCI / ExxonMobil Facilities Management Team – 2005, 2006, 2007

SKM / ExxonMobil Asia Pacific Retail Construction – 3 million hours worked with out lost time injury – 2006.

Successfully taken part in the 2008 BP Accredited Contractor Programme.

Our Company Safety Policy is:
“Commitment to Safety, Every Day, Every Way”

Our Resources

ACS is always working to build a quality environmental service in New Zealand.

ACS currently employs 15 experienced and trained engineering, design, sales, and administration staff along with over 200 authorised Service Agents. This allows us to maintain our 24/7 nationwide coverage, 365 days of the year .

All service vehicles have a range of spare parts and equipment that ensures that resolution times are quickly met.

ACS has the financial resources to ensure that our staff and service agents have the required equipment to perform their duties at the optimum level at all times.

We have 10 million dollars of Public liability insurance cover and require our authorised Service Agents to carry a minimum cover of 2 million dollars.

We can therefore confidently provide total project management from the design stage through to scheduled maintenance care.

Our Environment

Air Conditioning Services is committed to protecting the environment in all its operational activities. Specific environmental policies are designed to meet individual clients' needs.

ACS ensures that all HVAC and Refrigeration equipment that we install and service is utilised in an efficient manner to ensure that minimised waste and energy conservation are primary considerations at all times.

The disposal of all waste materials including refrigerant, water and failed or obsolete plant equipment is carried out in a safe and responsible manner utilizing recycling wherever possible.

Ongoing measurement and monitoring of HVAC and Refrigeration equipment to provide optimum performance assists in reducing the cost and environmental impact of our Client's assets.
